   A. Locating Data and Performance Measures for Your Library
   B. Reporting Libraries
   C. Contracting Libraries
   D. Libraries with No Public Tax Support
   E. Accuracy of the Statistics

2. **Definitions of Performance Measures** ..... v - x

3. **Data and Measures** ..... 1 - 72

   A. **Population Data and Measures** ..... 1 - 12

      1. **DATA**

         Population in legal service area [tax supported]; Population served by contract [tax supported]; total population served [combined legal service area and contract area]; Registered borrowers [combined service areas]; Nonresident borrowers; Nontax population served; Nontax registered borrowers

      2. **MEASURES**

         Percent of county served by library [legal service area]; Percent of county served by contract; Percent of county served by library [combined legal and contract areas]; Percent nonresident borrowers; Percent registered borrowers [combined legal and contract areas]; Registered borrowers per capita

   B. **Collection and Service Outlets Data and Measures** ..... 13 - 24

      1. **DATA**

         Items added; Items weeded; Total items held as of 9/90; total circulation [annual]; Adult circulation; Juvenile circulation; Central library; Branches; Bookmobiles; Other outlets

      2. **MEASURES**

         Volumes per capita; Acquisition rate [decimal ratio]; Turnover rate; circulation per capita; Percent of circulation — adult; Percent of circulation — juvenile

Table of Contents

- continued -

C. **Services Data and Measures** ..... 25 - 36

1. **DATA**

Hours open per typical week [unduplicated]; Hours open per typical week [duplicated]; Library visits per typical week; In library use per typical week; Reference questions answered per typical week; Interlibrary loans provided to other libraries; Interlibrary loans received from other libraries

2. **MEASURES**

Circulation per hour open [unduplicated]; Visits per capita [annual]; Percent of population served visiting library per typical week; In library use per capita [annual]; Reference questions answered per capita [annual]; Interlibrary loan net lending rate; Interlibrary loans per 1,000 circulation

D. **Staff Data and Measures** ..... 37 - 48

1. **DATA**

Total FTE librarians; MLS librarians FTE; NonMLS librarians FTE; Other staff FTE; total FTE Staff; Director's Salary; Director's Hours

2. **MEASURES**

Population served per FTE staff; MLS librarians per 1,000 population served; NonMLS librarians per 1,000 population served; Total librarians per 1,000 population served; Other staff per 1,000 population served; Total FTE staff per 1,000 population served

E. **Funding Data and Measures** ..... 49 - 60

1. **DATA**

Local government; State government; Federal government; Contract income; Other income; Total income

2. **MEASURES**

Percent of income from local government; Percent of income from state government; Percent of income from federal government; Percent of income from contract sources; Percent of income from all other sources; Local tax income per capita; total income per capita

F. **Expenditures Data and Measures** ..... 61 - 72

1. **DATA**

Salaries; Benefits; total staff expenditures; materials expenditures; Contract expenditures; Other operating expenditures; total operating expen-

ditures; Capital expenditures; Total expenditures

2. **MEASURES**

Percent of total staff expenditures in salaries; Percent of total staff expenditures in benefits; percent of total operating expenditures for staff; Percent of total operating expenditures for materials; Percent of total operating expenditures for contract services; Percent of total operating expenditures for other expenses; materials expenditures per capita; total operating expenditures per capita

4. **Selected Measures Grouped by Population Served** ..... A - E

5. **Public Libraries by Name, with NUC Symbol, County and City** ..... F - H

Introduction

The 1990 edition of the Idaho Public Library Statistics includes data gathered by the State Library with the "Public and District Library Annual Statistical Report Form." That report reflects:

1. All monies available to a library during the report year, regardless of the source of funds;

2. All expenditures made by the library, regardless of the source of funds;

3. Populations served within legal service areas and also by contract; and

4. Collections, services, and staff provided during the report year.

The Report Form complies with the Federal/State Cooperative System for Public Library Data (FSCS). Idaho has participated in FSCS since 1986. The Report Form has varied from year to year as the national database evolves. In 1990, data was received from all fifty states and the District of Columbia.

Two groups are responsible for the availability of theses statistics: the public librarians who took the time to fill out the Report Forms accurately and completely, and the State Library public library consultants who reviewed the completed forms. A special thanks goes to Glenda Anderson for her patient work in compiling the database.

In addition to the actual data reported, a number of performance measures have been calculated for each library. This year, the alphabetical listing of Input and Output Measures has been dropped from this report. All such measures are now to be found ordered by county. Per capita and percentage figures have been generated by microcomputer and are presented on pages facing the basic data from which these measures primarily were derived. It is hoped that this arrangement will help you to visualize relationships between the measures and the basic data elements themselves. Also, totals and measures for counties have been added, enabling comparisons of data and measures between counties.

Be creative in thinking about how the information contained in these numbers can help you improve library services. Use them to analyze your services and to work with your local government and your public.

It is important to remember that performance measures and comparative statistics are not absolutes. There are no right or wrong measures and no single measure tells a complete story. An individual library's statistics should be considered in the context of its roles, goals, and objectives.

Additional information on the use of statistics may be found in the American Library Association's Planning and Role Setting for Public Libraries and Output Measures for Public Libraries. Assistance in analyzing the statistics and performance measures is available from the State Library Development Division.

1. Notes on the Statistics

A. Locating Data and Performance Measures for Your Library

The organization of the number tables has been modified this year. In Section 3, data for all reporting libraries are still listed alphabetically by county and then by library name under each of six categories: Population, Collections and Service Outlets, Services, Staff, Funding, and Expenditures. Measures, both input and output, are listed in the same order on pages directly facing the data tables. A column has been added to the right of the library name which contains a letter code indicating TYPE of library. These codes are:

C	City
D	District
D**	District contracting for all services
OT	Other type of library which receives some tax support
S	School/Community
V***	Volunteer or privately funded library (no tax support)

In Section 4, selected performance measures are listed in descending order by TOTAL OR COMBINED POPULATION SERVED, which is defined as: "The population of a library's legal service area (within the boundaries of a city or a district) PLUS the population of any other areas served by contract." Libraries are grouped as follows:

Group 1 — Combined service population 10,000 or more
Group 2 — Combined service population between 5,000 and 10,000
Group 3 — Combined service population between 2,500 and 5,000
Group 4 — Combined service population between 1,000 and 2,500
Group 5 — Combined service population 1,000 or less

Group averages [means] and medians have been calculated for each group. Medians for the selected measures have been graphed. You may wish to plot your own numbers on your group's graph to see where your library stands in relation to other libraries within the grouping.

B. Reporting Libraries

There are 120 library entities in Idaho. Of these, 111 are publicly funded while nine receive no tax support. This year a total of 114 libraries submitted data in time for publication. This number includes 106 publicly funded libraries and eight libraries with no tax support. The five nonreporting libraries are listed below together with the letter code designating type of library:

Albion Community	V***
Clarkia District	D
Fremont District	D**
Kuna School/Community	S
Melba Volunteer	V***
Roberts City	C

1. Notes on the Statistics - continued

C. Contracting Libraries

Many libraries in Idaho are party to some type of contract—to provide services to other libraries or to receive services from other libraries.

Four libraries are districts which contracted during 1990 to have all services provided to their patrons by other libraries. Each of these four contracting districts have legally established boards and levy taxes, but have no facility, collection or other services. These libraries are included in the data tables. They report Population, Funding and Expenditures, but other data and measures are reported as zero. Services provided to their patrons are included in the numbers reported by the libraries with which they contract.

D. Libraries with No Public Tax Support

Nine libraries offer some public library services to their communities but receive no regular public tax support from a city or a district. These libraries rely on fundraising activities, donations, and volunteer staff to provide their services. This year data and measures for these libraries are included in the main tables by county. Their listings are in italics. However, their numbers are not included in county totals, county averages, or at the bottom line in the state totals.

E. Accuracy of the Statistics

The data in Section 3 are as they were reported by the local library to the State Library except where obvious inconsistencies were spotted in review by the public library consultants. In most cases, revised figures were provided by the local library.

The most notable exception this year is that semi-final population data from the 1990 Census were made available in February. Population figures for cities and countywide districts were adjusted in accordance with these latest figures. Seventy-five libraries' population figures were so adjusted. The remainder are as reported. Any remaining inconsistencies with respect to population can be partially attributed to errors in reporting of population which could not be corrected by press time.

As in previous years, Input and Output measures have been calculated by microcomputer. This year a few more calculations, primarily "percentages" have been added to the listings. These general measures are arranged on pages directly facing the data from which they were derived.

County Totals are given in each data table and County Averages are computed in each measure table. It is important to note that the County Averages are computed from the County Totals and not by averaging the individual figures in the column directly above. Although it is possible in many instances to obtain "identical" numbers by either method, it is better to rely on the county totals method.

Each per capita or percentage average is the average [mean] only for those libraries reporting that item. The total population served by those libraries reporting that item was used as the divisor. Population figures of nonreporting libraries and libraries receiving no tax support are not reflected in any average.

1. Notes on the Statistics - continued

An attempt has been made to correct a "doubling" error which occurs at the bottom line, especially in columns containing data on Population, Funding, and Expenditures. If left uncorrected, the figures for a contracting library are counted twice, once on their own line and once again on the providing library's line. In the population tables, the column for Contract Population will now show both "pluses" and "minuses." This allows the reporting of accurate population data across the page and keeps the "doubling" effect from occurring when totals are added down the page. In the money columns the doubling error has been corrected manually on the county subtotal line and again at the bottom line. Items which have been so corrected are placed in brackets [ ].

In Section 4, median figures have been calculated for all reporting libraries in each grouping. The median is defined as the "exact middle" figure. To derive the median, each column of figures is arranged in descending order and then divided in half. For columns having an odd number of entries, the median is an actual figure. For columns having an even number of entries, the median is calculated by dividing the sum of the two middle figures by 2.

2. Definitions of Performance Measures

This section defines the various measures that are presented in each of the MEASURES tables.

A library's TOTAL or COMBINED POPULATION SERVED is used as the divisor in calculating all "per capita" measures. The number of nonresident borrowers is not included, except in one "percentage" calculation given below.

- **Population Measures Section 3 A**

  - **Percent of county in legal service area** [Percent County LSA]

    This measure shows the percentage of a county's population which each library serves through direct public funding, i.e., this is a population measure of a library's primary tax base.

    $$\frac{\text{Population of Legal Service}}{\text{Total Population of County}} \times 100$$

  - **Percent of county served by contract** [Percent County CSA]

    This measure shows the percentage of a county's population which receives services from a library by virtue of a contract with a unit of local government other than the library actually providing the services. In most situations the unit providing the contract funds is another library entity, but there are cases where local governments contract for services from a library which is not under their jurisdiction.

    $$\frac{\text{Population of Contract Area}}{\text{Total Population of County}} \times 100$$

  - **Percent of county served by library** [Percent County LSA + CSA]

    This is the combined total population served by a library.

    $$\frac{\text{Populations of Legal Service Area + Contract Area}}{\text{Total Population of County}} \times 100$$

  - **Percent nonresident borrowers**

    This measure indicates the degree of usage of a library by nonresidents. It is the only measure given which combines nonresident borrowers with resident or "registered" borrowers.

    $$\frac{\text{Nonresident Borrowers}}{\text{(Nonresident Borrowers + Registered Borrowers)}} \times 100$$

  - **Percent registered borrowers** [Percent Registered LSA + CSA]

    $$\frac{\text{Registered borrowers}}{\text{Combined Population}} \times 100$$

  - **Registered borrowers per capita**

    $$\frac{\text{Registered borrowers}}{\text{Combined Population}}$$

    Registered borrowers per capita and Percent registered borrowers are essentially the same output measure expressed in two ways. Expressed either way, the measure indicates the number of

2. Definitions of Performance Measures - continued

people within a library's jurisdiction who know the library exists and have implied an intent to use it by registering for a card. Figures for libraries which have not updated their registration files within the past three years cannot be considered accurate.

- **Collection Measures Section 3 B**

  - **Volumes per Capita**

    This input measure relates the number of items (print and nonprint) in the library's collection to the number of persons in the library's combined service area.

    $$\frac{\text{Total Items Held}}{\text{Combined Population}}$$

  - **Acquisition Rate**

    This input measure relates the number of new acquisitions to the overall size of the collection. It is the number of titles acquired during the year divided by the number of items held by the library (including the new ones). This measure may be expressed either as a decimal ratio [.04] or as a percentage [4%]. The measure indicates the rate of growth of the library's collection during the report year.

    $$\frac{\text{Items Acquired}}{\text{Total Items Held}} \quad \text{or} \quad \frac{\text{Items Acquired}}{\text{Total Itens Held}} \times 100$$

  - **Turnover Rate**

    This output measure relates the number of items circulated to the overall size of the collection. It is the total circulation divided by the number of items held in the collection at the end of the year. The measure indicates the average number of times each item in the collection was circulated, assuming that circulation was evenly distributed among the library's holdings.

    $$\frac{\text{Annual Circulation}}{\text{Total Items Held}}$$

  - **Circulation per Capita**

    This output measure relates the number of items circulated to the number of persons in the library's combined service area. It is the annual circulation divided by the combined population served.

    $$\frac{\text{Annual Circulation}}{\text{Combined Population}}$$

    The measure indicates the average number of items circulated during the year to each resident in the library's combined service area.

  - **Percent Circulation—Adult**

    This is the percentage of adult materials which circulated during the year.

    $$\frac{\text{Adult Circulation}}{\text{Annual Circulation}} \times 100$$

2. Definitions of Performance Measures - continued

- **Circulation—Juvenile**

  This is the percentage of juvenile materials which circulated during the year.

$$\frac{\text{Juvenile Circulation}}{\text{Annual Circulation}} \times 100$$

- **Service Measures Section 3 C**

  - **Circulation per Hours Open** [Circ per Hr Open Undup]

    This output measure relates the number of materials from the local collection circulated to the number of hours the library is open. It is the total circulation divided by the number of hours open per typical week multiplied by 50 (the average number of weeks a library is open during a year.

$$\frac{\text{Annual Circulation}}{(\text{Unduplicated Hours Open per week} \times 50)}$$

    The measure indicates the average number of items checked out each hour the library was open, assuming that circulation was evenly distributed throughout the year.

  - **Visits per Capita** [Annual]

    This output measure relates the number of visits made to the library to the number of persons in the library's combined service area. It is attendance at the library during a typical week multiplied by 50 (the average number of weeks a public library is open during a year) divided by the combined population served by the library.

$$\frac{(\text{Visits per Week} \times 50)}{\text{Combined Population}}$$

    The measure reflects actual visits to the library. Attendance per typical week is usually estimated by counting the number of persons who enter the library during a typical week.

  - **Percent Population in Library per Week** [% Pop in Library per wk]

    This output measure is another way of estimating traffic in the library. The number of persons in the library per week is directly divided by the library's service population.

$$\frac{\text{Visits per Week}}{\text{Combined Population}} \times 100$$

  - **In-Library Use per Capita** [In Lib Use/Cap Annual]

    This measure relates the number of materials used in the library (but not checked out) to the number of persons in the library's total service area. It is in-library use per typical week multiplied by 50 (average number of weeks a public library is open during a year) divided by the library's service population.

$$\frac{(\text{In-library Use} \times 50)}{\text{Combined Population}}$$

2. Definitions of Performance Measures - continued

The measure indicates the average number of items used in the library per resident of the library's total service area. In-library use per typical week is usually estimated by counting the number of items picked up from study carrels and tables during a typical week.

- **Reference per Capita** [Ref Q's Per Cap]

This output measure relates the number of information contacts in which a staff member involves information sources to the number of persons in the library's total service area. It is the number of reference transactions per typical week multiplied by 50 (the average number of weeks a public library is open during a year) divided by the total population served by the library.

$$\frac{\text{(Reference Transactions x 50)}}{\text{Combined Population}}$$

The measure indicates the average number of times a resident of the service area received staff assistance in using information sources available or accessible through the library.

- **ILL Net Lending Rate**

This output measure relates the number of materials provided to other libraries through interlibrary loan to the number of materials borrowed from other libraries through interlibrary loan. It is the number of items loaned divided by the number of items borrowed.

$$\frac{\text{ILLs Loaned}}{\text{ILLs Borrowed}}$$

As a simple ratio, the measure indicates whether the library does more borrowing or more lending. A number above 1.0 indicates the library does more lending; a number below 1.0 indicates the library does more borrowing.

- **ILLs per 1,000 Circulation**

This output measure relates the number of materials borrowed from other libraries to the number of materials from the local collection circulated to borrowers. It is the number of materials borrowed from other libraries through interlibrary loan divided by total circulation multiplied by 1,000.

$$\frac{\text{ILLs Borrowed}}{\text{Annual Circulation}} \times 1{,}000$$

The measure indicates the number of interlibrary loans for every 1,000 items circulated from the local collection.

- **Staff Measures Section 3 D**

  - **Population per FTE Staff**

This input measure relates the number of persons in the library's total service area to the number of full-time equivalent (FTE) staff. It is the total population served by the library divided by the number of library staff in FTEs.

$$\frac{\text{Combined Population}}{\text{Total FTE Staff}}$$

2. Definitions of Performance Measures - continued

Full-time equivalent (FTE) is the total number of hours per week worked by all staff divided by 40. In this context, full-time means 40 hours per week, regardless of how many hours per week the library is open. The measure indicates the average number of persons each member of the staff might serve, and the potential workload to be carried by each.

- **Total FTE Staff per 1,000 Population** (or per 10,000 Pop)

This input measure is equivalent to Population per FTE Staff. It relates the same information about Staff to Population Served, but is expressed in a decimal (in the per 1,000 equation) or in a number between 1 and 10 (in the per 10,000 equation. This form of the measure is particularly useful when you wish to graph the measure in proximity to other measures on a similar scale.

$$\frac{\text{FTE Staff}}{\text{Combined Population}} \times 1{,}000 \text{ (or } 10{,}000)$$

NOTE: The other measures listed in STAFF MEASURES are calculated in the same way, except that they use Librarians or Other Staff as the numerator.

- **Funding Measures Section 3 E**

  - **Percent Income** [Local, State, etc.]

These input measures have been calculated to give a ready reference table that may be scanned with a minimum of effort to ascertain the overall pattern of funding for a given library or in a specific area of the state.

$$\frac{\text{[Local Tax Income] etc.}}{\text{Total Income}} \times 100$$

These measures show the proportion each funding source contributes to the library's total revenues for the year.

  - **Total Income per Capita** [and or Local Tax Income Per Capita]

These input measures relate annual revenue information to the number of persons in a library's service area. They are dollar amounts collected divided by population served.

$$\frac{\text{Total Income}}{\text{Combined Population}}$$

These measures indicate funds available per person for the provision of library services.

- **Expenditures Measures Section 3 F**

  - **Percent Salaries** (and percent Benefits) of Total Staff Expenditures [% Sal of ttl stf exp] [% Ben ttl stf exp]

These percentages have been calculated and listed to provide are ready reference table which may be easily scanned to ascertain the general proportions of the personnel budget which are allotted to salaries and benefits in a given library or in a specific area of the state.

$$\frac{\text{[Salaries Expended] etc.}}{\text{Total Staff Dollars Expended}} \times 100$$

2. Definitions of Performance Measures - continued

Percent Total Staff Dollars Expended [% TOTAL STAFF EXP]
Percent Materials Expended [% Mat'l Exp]
Percent Contracts Expended [% Contract Exp]
Percent Other Expended [% Other Exp]

These percentages have also been calculated and listed to provide a ready reference table which shows the proportions of a library's operating expenditures going to each category.

$$\frac{\text{Materials Expended [etc.]}}{\text{Total Operating Expended}} \times 100$$

Total Operating Expended per Capita
Total Materials Expended per Capita
Total Staff Dollars Expended per Capita

These output measures indicate the various amounts of money spent per person in each category.

$$\frac{\text{Total Operating Expended [etc.]}}{\text{Combined population}}$$

Key: Column Headings

POPULATION DATA

'90 Census - 1990 Census figures
Legal Pop [Lib Tax] - population in legal service area (tax supported)
Contract Pop - population served by contract (tax supported)
Comb. Pop [Leg+Con] - total population served (combined legal service area and contract area)
Comb. Reg - registered borrowers (combined service areas)
NonRes - nonresident borrowers
NonTax Pop - nontax population served
NonTax Reg - nontax registered borrowers

POPULATION MEASURES

County LSA(%) - percent of county served by library (legal service area)
County CSA(%) - percent of county served by contract
County LSA+CSA (%) - percent of county served by library (combined legal and contract areas)
NonRes Borrowers (%) - percent nonresident borrowers
Registered LSA+CSA(%) - percent registered borrowers (combined legal and contract areas)
Reg. Bor. Per Capita - registered borrowers per capita

COLLECTION DATA

Items Added
Items Weeded
TTI Held 9/90 - total items held as of 9/90
Total Circ - total circulation (annual)
Adult Circ - adult circulation
Juven Circ - juvenile circulation
CE - central library
BR - branches
BkM - bookmobiles
Other Outlets

COLLECTION MEASURES

Volumes per capita
Acquis. Rate (ratio) - acquisition rate (decimal ratio)
Turnover Rate
Circ per capita - circulation per capita
Circ Adult (%) - percent of circulation - adult
Circ Juven (%) - percent of circulation -juvenile

SERVICES DATA

Hours Undup - hours open per typical week (unduplicated)
Hours Dup - hours open per typical week (duplicated)
Weekly Visits - library visits per typical week
In Library Use/Week - in library use per capita (annual)
Ref Ques per week - reference questions answered per capita (annual)
ILLs Provided - interlibrary loan net lending rate
ILLs Provided - interlibrary loans per 1,000 circulation

SERVICES MEASURES

circ per hr open undup - circulation per hour open (unduplicated)
visits per cap annual - visits per capita (annual)
% pop in library per week - percent of population served visiting library per typical week
in lib use/cap annual - in library use per capita (annual)
ref ques. per cap annual - reference questions answered per capita (annual)
ILL net lending rate - Interlibrary loan net lending rate
ILLs per 1,000 circ - Interlibrary loans per 1,000 circulation

STAFFING DATA

TTI Libs FTE - Total FTE librarians
Libs FTE - MLS librarians FTE
NonMLS FTE - NonMLS librarians FTE
Other Staff - Other staff FTE
Total FTE Staff
Director's Salary
Director's Hours

STAFFING MEASURES

population per FTE staff - population served per FTE staff
MLS lib per 1,000 pop - MLS librarians per 1,000 population served
Other lib per 1,000 pop - NonMLS librarians per 1,000 population served
Total lib per 1,000 pop - Total librarians per 1,000 population served
Other staff per 1,000 pop - Other staff per 1,000 population served
Total FTE staff per 1,000 pop - Total FTE staff per 1,000 population served

FUNDING DATA

Local Gov Inc - Local government income
State Gov Inc - State government income
Federal Income - Federal government income
Contract Income
Other Income
Total Income

FUNDING MEASURES

percent income loc gov - percent of income from local government
percent income state gov - percent of income from state government
percent income fed gov - percent of income from federal government
percent income contract - percent of income from contract sources
percent income other - percent of income from all other sources
local tax income per capita
total income per cap

EXPENDITURES DATA

Sal - salaries
Ben - benefits
Total Staff Exp - total staff expenditures
Mat Expend - materials expenditures
Contract Exp - contact expenditures
Other Op Exp - other operating expenditures
Total Op Expend - total operating expenditures
Capital Expenditures
Total Expenditures

EXPENDITURES MEASURES

% sal of ttl stf exp - percent of total staff expenditures in salaries
% ben of ttl stf exp - percent of total staff expenditures in benefits
% total staff exp - percent of total operating expenditures for staff
percent mat. exp - percent of total operating expenditures for materials
percent contract exp - percent of total operating expenditures for contract services
percent other exp - percent of total operating expenditures for other expenses
mat. exp /cap - total materials expenditures per capita
total op exp /cap - total operating expenditures per capita

Errata

(Editor's Note: Errors were realized in this material after printing; listed below are the revisions. Please note these revisions in your copy(ies).)

Page II: • There is a reference to graphics, however, there are no graphs included in this publication;
• Under total libraries: there are 112 publicly funded libraries, and eight volunteer libraries; under reporting libraries: there are 108 publicly funded libraries reporting, and six volunteer libraries reporting; there were six non-reporting libraries; there are eight libraries without tax support.

On page 26: In "Services Data" (following Services Data pages, also) the column heading to the right of "ILLs provided" should be "ILLs Received."

On page 56: Elk City's figures should read Local Government (0) and Contract Inc. (567).

** Washington County: Cambridge is a district (D) not a volunteer (V***); consequently, Washington County and Totals figures have been revised. Please note the change from V*** to D on all affected pages.
